**THE CLAIMS**

- 1 Claim 1. A binocucorder, comprising:  
2 a camcorder including image processing elements and a line-of-sight;  
3 a binocular including first and second tubular body portions which are  
4 spaced apart parallel to each other, each having a forward end incorporating  
5 an objective lens, having an effective line-of-sight centered between said  
6 objective lenses parallel to said tubular body portions, said camcorder being  
7 mounted on said binocular; and,  
8 periscope means mounted on said camcorder adapted to receive  
9 incident light on said binocular effective line-of-sight and reflect said light onto  
10 said camcorder line-of-sight into said image processing elements of said  
11 camcorder.
- 1 Claim 12. In combination with claim 1: said camcorder having a housing  
2 having a forward portion defining a closed periscope compartment containing
